

INFORMATION ABOUT YOUR GARBAGE COLLECTION SERVICE

Senate Bill 1383 (SB 1383) requires that residents and businesses divert organic material away from the landfill. Organic byproducts like food scraps, food soiled paper products, compostable paper, and yard trimmings make up a large portion of the waste that is dumped in the landfills each year.

Organics left to decompose in landfills release a greenhouse gas called methane. Methane traps the sun's heat and warms the atmosphere, contributing to climate change. Reducing organics in our garbage will help the climate crisis and extend the life of the Fink Road landfill. The County garbage collection service recycles the organics in the green cart and converts them for beneficial reuse. Non-organic recyclable materials in the black cart are also recycled. We all need to do our part to save the environment and combat climate change.

Garbage Collection Service

- 1 Black Mixed Material (Landfill & Recycle) cart
- 1 Green Organic Waste (Compost) cart

Prevent Cart Contamination

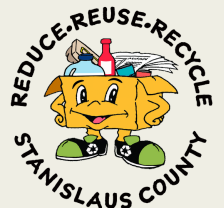

- Avoid placing plastic bagged items inside the compost cart. Place your compostable materials inside a paper bag or directly into the cart.
- Avoid cart contamination by placing each acceptable item in their respective cart.
- Non-acceptable items in a cart can ruin an entire load of compost or recyclables and will have to go to the landfill for disposal.

Cart Contamination Monitoring

- SB 1383 requires the County to monitor carts and issue notice of violations for contamination.
- You may receive a notice if contamination is identified in your carts.
- Administrative citations may be issued if your carts are repeatedly contaminated.

@ WillyRecycle

Refer to the diagram below for acceptable items for each cart.

Black Cart (Landfill & Recycle)

Plastic bags, film and wrap

Ceramics and dishware

Metal cans and aluminum foil

Pet waste, diapers and feminine products

Plastic foam

Glass food and beverage containers

Shelf-stable cartons

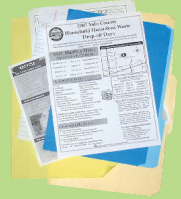

Plastic containers and other rigid plastic items

Green Cart (Compost)

Newspaper, junk mail and magazines

Office Paper

Fruit and vegetable scraps

Spoiled food, dairy products, egg shells and meat scraps

Paper boxes, egg cartons and paper tubes

Soiled paper cups, paper plates, tissues and napkins

Paper take-out containers and other food-soiled paper

Yard Waste

**NO
FOOD AND
GREEN WASTE**

**NO
METAL, PLASTIC,
AND GLASS**
